1886.

No. $\frac{S.B.}{180}$ of 1885.

From

The SURGEON-GENERAL with the

GOVERNMENT of BOMBAY,

To

The CHIEF SECRETARY to GOVERNMENT,

General Department.

Bombay, 31st March 1886.

Sir,

I have the honour to submit, for the information of His Excellency the Governor in Council, my Administration Report on the Lunatic Asylums of this Presidency for the year 1885, together with summaries of the reports by the Superintendents.

2. The asylum buildings are generally in good order. At Colába, Hyderabad and Ahmedabad only ordinary repairs have been effected. At Dhárwár, under Government Resolution No. 1762, dated 16th November 1885, a building formerly used as the old Civil Hospital and really part of the asylum will, before the end of the financial year, be converted into 10 additional cells. At Poona an additional ward for 5 female lunatics has been constructed and the escape of a patient necessitated adding to the height of a wall and transferring a partition a little to one side. The conservancy and water-supply at all the asylums is satisfactory. Gardening has not been very fertile in produce; at Ahmedabad there was a failure of vegetables early in the year. At Dhárwár the total realizations under this head amounted to Rs. 130. At Hyderabad a daily supply of vegetables was furnished to the inmates. At Colába there is no garden. The accommodation afforded by the asylums has not been sufficient for the wants of the Presidency, but under the agrrangements made at Dhárwár, as mentioned above, by the use if necessary of a part of the jail at Ratnágiri, and with the approaching opening of the new Ratnágiri Asylum, there will, for some time to come, be plenty of accommodation.

3. The general health of the asylum population was, with the exception of the outbreak of cholera at Dhárwár, referred to in the summary of Surgeon-Major McConaghy's report, very satisfactory, and the mortality was less than in 1884, the number of deaths being 48 as compared with 59.

4. The usual statements are appended and I beg to offer the following remarks for the information of Government.

Statement No. I., giving the admissions, discharges, &c., of lunatics in the asylums of this Presidency, shows that the total population during the year was 899 against 920 in the previous year; of this number 760 were males and 139 females. There were 213 males and 18 females admitted, and 5 males and 1 female re-admitted. The number discharged was 221, including 203 males and 18 females; of these 63 were cured, 156 were transferred to friends (137 improved and 19 unimproved), two were discharged otherwise (1 escaped, and 1 transferred to the Colába Station Hospital).

The deaths numbered 48 against 59 in the previous year. On the 31st December 1885, 516 males and 114 females, total 630, remained. The daily average strength was 537·6 males, 115·6 females, total 653·2, as compared with 626·4 in 1884.

The percentages of cures and deaths to the daily average strength were :—

Cured ...	Males	...10·0	Total	... 9·6.
	Females...	... 7·7		
Died ...	Males	... 7·6	Total	... 7·3.
	Females...	... 6·0		

The percentages to admissions were :—

Cured ...	Males	...24·7	Total	...26·5.
	Females...	...47·3		
Died ...	Males	...18·8	Total	...20·2.
	Females...	...36·7		

5. Statement No. II. is the return of criminal lunatics. On 1st January 1885 there remained 90 males and 4 females, 18 males and 2 females were admitted, making a total of 108 males and 6 females; 114 criminals confined as compared with 116 in the previous year. Of these, 16, all males, were discharged, 7 males died, leaving 85 males and 6 females, total 91, in confinement at the end of the year. The daily average strength was 85·5 males, 4·7 females, total 90·2, against 87·6 in the year 1884.

6. Statement No. III. shows the religion, sex and residence of patients admitted during the year. Of the 237 patients admitted 94 were Christians, including 91 Europeans and 3 natives, 77 were Hindus, 59 Mahomedans, six Párs and one of another caste. The majority of the Europeans admitted are soldiers and are received from all parts of India; the natives are admitted from various parts of the Presidency.

7. Statement No. IV. gives the occupation of the patients admitted. European soldiers furnish the greatest number of admissions, 79, then servants, labourers, &c. 42, beggars, mendicants and fakirs 30, cultivators 19, and merchants, &c. 12. In fourteen cases the occupation is returned as unknown.

8. Statement No. V. shows the ages of patients admitted according to sex. Under 20 there were 10 males and 1 female, between the ages of 20 and 40 there were 180 males and 13 females, from 40 to 60 years 27 males and 4 females, and upwards of 60 one of each sex.

9. Statement No. VI. gives the types of insanity among the asylum population, and the following table shows the numbers admitted, recovered, improved and the death in each form of insanity :—

	Remained.	Admitted.	Total.	Recovered.	Improved.	Died.
Acute mania	204	124	328	46	51	12
Chronic mania	158	21	179	11	13	9
Melancholia	42	39	81	3	41	2
Acute dementia	67	14	81	2	4	6
Chronic dementia	151	29	180	1	24	16
Paralysis of the insane	...	1	1	...	...	1
Idiocy	16	1	17	...	1	...
Imbecility	15	3	18	...	2	1
Mania with epilepsy	4	4	8	...	1	...
Dementia do.	3	...	3	...	...	...
Amentia do.	2	1	3	...	...	1
Total ...	662	237	899	63	137	48

10. Statement No. VII. gives the alleged causes of insanity among the asylum population. Of the 899 cases a cause is given in 415 and is unknown in 484. Physical causes account for 344 and moral causes 71 cases. Excess in the use of gánja is credited with 139 cases, of spirits with 48 and opium with 11. In 21 cases fever is the alleged cause, in 22 epilepsy, in 7 injury to the head, in 10 destitution, 6 syphilis, in 3 each meningitis and climate, in one each child-birth, uterine disorder, sexual excess and old age, in 14 sunstroke, in 10 masturbation, in 21 heredity, in 10 the disease was congenital, and in 15 previous attacks were alleged. Of moral causes, 52 cases are attributed to grief, 2 to anger, 4 to fear, 8 to religion, 3 to jealousy and 1 each to study and anxiety. The following are, so far as can be ascertained, the causes of insanity of criminal lunatics charged with crimes of violence :—

Gánja	10	Congenital	1
Opium	1	Grief	2
Fever	1	Religion...	1
Epilepsy... ...	2	Jealousy...	1
Hereditary ...	1	Unknown	52

11. In Statement No. VIII. we have the diseases other than insanity for which the patients were treated in the asylum hospitals with the results. At the beginning of the year there remained in hospital 67 patients, 215 were admitted, making a total treated of 282; of these 151 were discharged cured, eight were

discharged otherwise, 48 died and 75 remained under treatment at the end of the year. The more common diseases necessitating admission to hospital were ague 61, diarrhœa 37, debility 29, dysentery 14. The causes of the deaths were debility 17, diarrhœa 11, epilepsy 6, cholera 4, malarious fever 2, dropsy 2, and one each from old age, dysentery, pneumonia, apoplexy, anœmia, phthisis and worms.

12. Statement No. IX. shows the cash accounts of the asylums for the year. The total receipts were Rs. 1,39,518-3-10 against Rs. 1,30,126-9-7 in the previous year. Of this, Rs. 1,13,037-0-5 were received from the treasury, Rs. 14,672-10-4 was the sum adjusted by Government on account of works done by the Public Works Department, water-supply, cost of English medicines and stores and clothing supplied from the Jail Department, Rs. 8,814-14-4 were received from paying patients and Rs. 2,993-10-9 was the value of articles received from the Manufacture Department and used in the asylums. Deducting the amount remitted to the treasury on account of paying patients from the sums received from the Treasury and adjusted by Government and also from the value of articles received from the Manufacture Department, the net cost was Rs. 1,21,888-7-2 as compared with Rs. 1,15,908-13-7 in the previous year; the chief increase is in the charges incurred by the Public Works Department. The net cost per patient was Rs. 186-9-7 against Rs. 185-0-7 in the year 1884. The following table gives the net cost in each asylum for the past two years:—

	1885.			1884.		
	Rs.	a.	p.	Rs.	a.	p.
Colába	249	7	1	262	8	6
Poona	153	0	6	132	2	8
Dhárwár	249	12	1	233	5	4
Ahmedabad ...	115	10	9	119	14	5
Hyderabad ...	111	10	2	86	10	10
Average cost ...	186	9	7	185	0	7
Average daily strength ...	653·2			626·4		

The figures given in the above table for 1884 do not correspond with those given in a similar table in last year's report, but are corrected in accordance with the remark of the Government of India in their letter No. 369, dated 25th July 1885.

13. Statement No. X. shows the establishments as they stood at the end of the year. The total monthly cost was Rs. 3,474-8-0 as compared with Rs. 3,852-8-0 in the previous year. The decrease is due to the Acting Superintendent of Colába Asylum having been a junior officer and to certain reductions at Hyderabad.

14. Statement No. XI. shows receipts and expenditure on account of manufactures in the asylums. The mean population was 653·2—males 537·6 and females 115·6. The average number employed was 306·2—253 males and 53·2 females. The total credits amounted to Rs. 5,814-2-4 and the total debits to Rs. 2,356-2-6, showing an excess of credits of Rs. 3,492-10-0. The total net profits shown in the memorandum below the table was Rs. 3,383-10-0 as compared with Rs. 3,733-0-9 in the previous year.

15. Statement No. XII. gives the condition of the asylum population as to sex, caste and marriage; the statement is summarized in the following tables:—

No. I.

		Total Number.									Percentages of					
		Treated.			Cured.			Died.			Cured to Treated.			Deaths to Treated.		
		Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.

16. Statement No. XIII. gives further particulars regarding criminal lunatics as to caste, sex, nature of the crimes committed, and the number of this class employed. Out of an average strength of 90·2 (including 85·5 males and 4·7 females) 32 males and 3·3 females were employed. With regard to the crimes committed 24 males had been charged with theft, 42 males and 4 females with murder, 4 males with culpable homicide not amounting to murder, 5 males with attempt to commit suicide, 13 males with voluntarily causing hurt, seven males with housebreaking, six males with mischief and assault, and seven males and two females with miscellaneous offences.

17. I visited and inspected the asylums at Colába and Poona several times and I also inspected the asylums at Dhárwár and Ahmedabad in the course of my tour, while the asylum at Hyderabad was inspected by the Deputy Surgeon-General of the Sind Circle. The Superintendents have performed their duties efficiently. Surgeon Ferguson, who took charge of the Colába Asylum from Surgeon-Major Nolan in July when the latter was obliged suddenly to proceed to Europe, is to be commended. The period was a critical one owing to the large number of Europeans in the asylum well or semi-well, some of whom considered themselves aggrieved by not being sent home in the previous cold season as they expected (owing to want of accommodation on boardship). These men were very discontented, and on one occasion created a disturbance; but Surgeon Ferguson by tact and judicious treatment prevented a recurrence. Dr. De Tatham (Hyderabad) was successful in employing lunatics in building some new isolating cells. At Dhárwár Dr. McConaghy had much trouble during an epidemic of cholera which he managed well (*vide* Abstract of the Dhárwár Report). The subordinate servants are generally reported on favourably by the Superintendents. The Official Visitors, with two exceptions, have been regular in their attendance.

I have the honour to be,

Sir,

Your most obedient Servant,

W. J. MOORE,

Surgeon General with the Government of Bombay.

COLA'BA ASYLUM.

Superintendent.—SURGEON-MAJOR W. NOLAN, M.D.

The asylum was under the superintendence of Surgeon-Major Nolan from the 1st of January 1885 to the 27th of July when Surgeon-Major Nolan went on furlough, and Surgeon A. F. Ferguson was appointed to act as Superintendent, remaining in charge till the end of the year. No alteration was made during the year as regards accommodation which is for 35 Europeans, 215 native males, and 50 females, European and Native. The number of patients remaining in the asylum on January 1st of 1885 was 321, *viz.*, 267 males and 54 females. During the year there were 127 admissions, 119 being males and 8 females, making a total of 448 patients under care during the year. The highest number under treatment at any one time was 329 and the lowest 286. Of the total, 23 were discharged cured, 101 improved, 11 not improved, 1 transferred to Colába Station Hospital, while 25 died, leaving on the 31st of December 287 patients in the asylum, namely 237 males and 50 females. The daily average strength was 256·0 males and 51·5 females, making a total of 307·5. The percentages on the daily average strength were Europeans recovered 10·4, died 4·1: natives recovered 6·9, died 8·8. Among the Europeans admitted 79 were soldiers, 1 military officer, 3 clerks, 2 ticket-collectors, 1 governess, 1 carpenter, 1 Traffic Superintendent, 1 Forest Officer, 1 mechanic, 1 unknown. The cause of insanity amongst Europeans was known in 88 cases and unknown in 55. Among the known causes excessive use of spirits accounted for 23 cases, sunstroke or exposure to the sun 13, syphilis 5, injury to the head 6. The moral causes of grief accounted for 12, of religion 2, of fear 1. Among natives the causes were known in 136 cases and unknown in 169. Of the known causes the use of Gánja heads the list, 29 being attributable to this habit, while 14 were ascribed to the use of spirits and only 5 to opium; ten cases were attributed to destitution and 14 to grief. Of the types of insanity 127 were acute mania, 68 chronic mania, 70 melancholia, 43 acute dementia, 110 chronic dementia, 12 imbecility, 1 general paralysis of the insane, 3 idiocy, of epilepsy complicated with various forms of insanity 14 cases. Of the 127 admissions 93 were Christians, 15 Hindus, 13 Mahomedans and 6 Pársis. The daily average strength fo criminal lunatics was 54·7 males and 1·7 females, total 56.4. Three were discharged for trial, one transferred from the roll of criminals to the civil list, five died, and there remained at the end of the year 52 males and 3 females. The total number of cases treated in hospital was 103. All patients were examined on admission to ascertain if they were vaccinated. The accommodation has been below the demands. Surgeon-Major Nolan suggested twelve new cells for females, and twenty strongly built cells for criminal and dangerous lunatics should be added; but the proposal was not entertained as it appears useless to spend money on these old buildings. Repairs have been executed as usual by the Public Works Department. The Apothecary's quarters were converted into a recreation-room and the quarters for harmless insanes were utilized as Apothecary's quarters. There has been no change in the strength of the establishment, but in the place of a purveyor on a salary of Rs. 50 plus 10 house-rent a steward was appointed on a salary of Rs. 60. The conduct of the different members of the establishment is reported as satisfactory. The Visitors were regular in their attendance with two exceptions. The treatment is conducted on general and rational principles. Hygienic surroundings (as far as the locality will admit), good and regular diet, light work and healthy amusements are provided. For Europeans there is a library and recreation-room with books and newspapers, also cricket quoits, billiards, card dominoes, &c. The natives are occupied with cane-work, weaving, wheat grinding, gardening, &c.

POONA ASYLUM.

Superintendent.—SURGEON-MAJOR COOK, M.D.

An additional ward for 5 female lunatics has been built, but not yet given over for use. Some slight alterations in the way of adding to the height of a wall and transferring a partition were made in order to prevent repetition of the escape of a lunatic. There is accommodation for 61 males and 17 females: 59 males and 21 females remained at the close of the year 1884, and 59 males and 19 females at the close of last year; 20 males were admitted during 1885 and 16 males and 1 female were discharged. The percentage of cured to strength was 2·5 and died 6·2. Acute mania gave the largest number of new cases. There were 5 deaths during the year, and the number of sick treated was 40, of whom 18 were new admissions. Male patients (on an average) 23 daily were employed in the garden of the asylum, in the compound of the Sassoon Hospital, and of the Collector's office: female patients (average 10 daily) were employed grinding grain. The net cost of each patient was Rs. 153-0-6 as compared with Rs. 132-2-8 in 1884. The increase is attributable to the building of a new ward for five lunatics.

DHARWAR ASYLUM.

Superintenent.—Surgeon-Major W. McConaghy.

This asylum was under the superintendence of Surgeon-Major Bainbridge till the 3rd February 1885; afterwards till the end of the year under Surgeon-Major McConaghy. On the 3rd of July last the Visiting Committee recommended that the old Civil Hospital immediately adjoining should be utilized to increase the accommodation. Government in Resolution No. 1762, Public Works Department, dated 16th November 1885, approved of the suggestion and the building is now being converted into 10 cells which will be ready for occupation before the end of the financial year. At present the asylum only accommodates 18 patients. Twenty-seven patients were treated during the year, 6 being new cases; 4 patients were discharged. The largest proportion of cases belonged to the type "chronic dementia". Twenty patients were under treatment during the year for complaints other than mental, and four deaths occurred, all in August and due to cholera. A full report of this outbreak was submitted by the Superintendent. Cholera had been more or less prevalent in the town of Dhárwár; nine cases also occurred in the Camp and Civil Lines and three in the village of Sayadápur near the asylum, the last on the 10th of August in the person of the son of the bhisti attached to the asylum. There would, however appear, to be some doubt if this case were really cholera. The first case occurring in the asylum was on the 14th of August in the person of a weak emaciated man, who had occasionally worked in the garden. A second case occurred on the 17th, a third on the same day, and a fourth on the 18th. Every precaution possible was taken, and each case as it occurred was removed for treatment into the old Civil Hospital, and on the 20th the healthy male lunatics were removed into tents and subsequently to a shed on the Hubli Road which had been erected as a town cholera shed by the Municipality. It is a notable fact that although 6 males were attacked no female lunatics suffered, although there were 8 females present under exactly the same conditions. If the cholera were not introduced into the asylum by the bhisti, it can only be attributed to the prevailing epidemic influence, and the Superintendent candidly confesses he was unable to arrive at any definite conclusion as to the immediate cause of the origin of the outbreak. It may, however, be noted that on the morning of the outbreak of the disease there were three lunatics in excess of the cell accommodation, but as they were quiet and harmless they slept in the day-room with one of the warders, so there was no over-crowding.

A daily average number of 4·1 males and 0·7 females was employed in the garden. The realization for the garden paid into treasury was Rs. 60 and the value of vegetables supplied to the patients Rs. 41, which with a balance on hand of Rs. 29-0-10 brought the total realizations up to 130-0-10. The cost of diet per patient was Rs. 50-2-9 or Rs. 6-13-6 more than in 1884. This is due to expenses incurred during the outbreak of cholera and to the higher average price of grains, dál having risen from Rs. 26-8, and rice and wheat from Rs. 27-8 and Rs. 27 to Rs. 34-4 and Rs. 34. The conduct of the servants is reported satisfactory, and mention is made that 3rd Class Hospital Assistant Chimáji Rámchandra continues to perform his duties in an efficient manner. The Visiting Committee made regular monthly and two special inspections.

AHMEDABAD ASYLUM.

Superintendent.—Surgeon-Major Robb, M.D.

No addition to, or alteration of, the asylum buildings has been effected during the year. Necessary repairs have been done by the Public Works Department. The accommodation is for a maximum of 90 males and 18 females. The greatest number confined on any one night was 113, and the daily average strength was 110·2. It was not possible to admit all applicants immediately. The water-supply, food, clothing and conservancy are satisfactory. The night-soil refuse is stored in pits for manure, and used for the asylum garden, which however has not been so profitable as in the previous year owing to the failure of vegetables in the beginning of the season, and the cost of bullocks to replace three that had become unserviceable. Gardening, grinding grain, and the usual menial work of the institution are the only duties which are taken in hand. Out-door occupation is encouraged to its fullest extent, but a great many of the patients stoutly refuse to engage in any kind of labour. There has been no change in the personnel of the establishment during the year. The Superintendent again reports most favourably of the manner in which Hospital Assistant Joseph Solomon "maintained his well-earned reputation." The total expenditure for the year was Rs. 13,718-5-8, which is Rs. 1,066-9-2 less than the expenditure of the previous year. The net cost per head was Rs. 115-10-9 as compared with Rs. 119-14-5 for 1884. The usual Visitors' meetings have been held, and the Superintendent desires to record his thanks to the Visitors for the readiness and courtesy with which they have supported him.

SIR COWASJI JEHANGIER ASYLUM, HYDERABAD, SIND.

Superintendent.—Surgeon-Major Keelan: Acting Surgeon-Major DeTatham.

Surgeon-Major DeTatham took charge of this asylum on the 19th June 1885 when Surgeon-Major Keelan proceeded on furlough. It is situated about 2½ miles from Hyder-

abad by the side of the high road leading from Hyderabad to Gidu Bandar. It consists of a large enclosure surrounded by mud wall, the greater part of which is under cultivation. Within, there are two smaller enclosures, locally termed fort. In each fort are a number of pendals built on raised plinths in which the patients sleep. The average daily number of patients in the asylum during the year has been 135, of whom 119 were males and 16 females. The largest number present at any one time was 149. Fifty-three patients were admitted, 48 males and 5 females, the 49 males including six criminals. The daily average strength of criminal lunatics was 16. The total number of admissions into hospital was 72, the largest number being for ague. Visitors' meetings were held every month except on two occasions when a quorum could not be obtained. Those patients who are willing to work are employed in drawing water, grinding grain, chopping wood, cooking, tailoring, gardening, &c. Surgeon-Major DeTatham reports he is "now employing a party of lunatics" in building two small rooms for the reception of excited patients, and that the garden, under the charge of a *máli* with a few lunatics to assist him, has furnished a daily supply of fresh vegetables to the inmates of the asylum all through the year. Dr. DeTatham also reports that during the hot months he gave jowári bread every other day instead of bájri bread—a change much appreciated by the patients. The establishment has undergone a reduction during the year which was ordered as a tentative measure for six months, *viz.*, 2 warders, 1 cook, 1 goorgah and 1 tailor and the pay of the barber was increased by Rs. 2 to do the goorgha's work in addition to his own. At the close of the year it consisted of 1st Class Hospital Assistant and 21 subordinate servants. Hospital Assistant Mendes is again reported as performing his duties to the entire satisfaction of the Superintendent, and the subordinate servants have all worked well.

ANNUAL STATEMENT No. 1.

Showing separately the Admissions, Discharges, &c., &c., of Lunatics in the Lunatic Asylums in the Bombay Presidency during the year 1885 and ten previous years.

Annual Report on Lunatic Asylums in the Bombay Presidency for 1885.

No. 1612.

GENERAL DEPARTMENT.

Bombay Castle, 6th May 1886.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—130, dated 31st March 1886—Submitting the Annual Administration and Progress Report of the Lunatic Asylums in the Bombay Presidency for the year 1885.

RESOLUTION.—There are 5 Lunatic Asylums in the Bombay Presidency, viz., those at Colába, Poona, Dhárwár, Ahmedabad and Hyderabad in Sind. A new asylum will soon be opened at Ratnágiri: and, as arrangements have recently been made both for using a part of the jail in that town when necessary and for increasing the size of the Dhárwár Asylum it seems probable that the accommodation provided will in future be amply sufficient for the wants of the Presidency.

2. During the year 1885 the total number of persons treated at the asylums was 899, as against 920 in the previous year. At the end of 1884 the number of inmates was 668. Two hundred and twenty-one were discharged during the year, 48 died—as against 59 in 1884—and there were 231 new admissions. The number of inmates at the end of the year was consequently 630. The daily average strength was 653·2 as compared with 626·4 in 1884.

3. Of the 231 persons admitted during the year 213 were males and 18 were females. Ninety-four were Christians—91 of these being Europeans—77 Hindus, 59 Mahomedans, 6 Pársis and 1 of another caste. European soldiers alone numbered 79.

4. The cause of insanity was known in 415 cases only out of the 899. Physical causes—chiefly excess in the use of gánja—account for 344 cases and moral causes—chiefly grief—account for 71.

5. Of criminal lunatics there were 94 at the beginning and 91 at the end of the year. The total number confined during the year was 114 as compared with 116 in 1884. The daily average strength was 90·2 as against 87·6 in 1884. Twenty-four of the criminal lunatics had been charged with theft and 46 with murder.

6. The net cost to Government on account of the five asylums was Rs. 1,21,888-7-2 or Rs. 186-9-7 per head as compared with Rs. 1,15,908-13-7 or Rs. 185-0-7 per head in 1884. The figures for 1884 as given in the report under review do not correspond with those given in the report for 1884 but the difference is explained satisfactorily. The cost per patient was lowest at Hyderabad (Rs. 111-10-2) and highest at Dhárwár, where it rose from Rs. 233-5-4 in 1884 to Rs. 249-12-1 in 1885. No reasons have been assigned by the Surgeon General for this increase, though in the report of the Superintendent of the Dhárwár Asylum a part of the increase is stated to be due to the expenses incurred during the out-break of cholera and the higher average price of grains consumed in the asylum. The net cost per patient at Colába compared with the net cost at Ahmedabad and Poona seems excessive. The fees obtained from paying patients rose from Rs. 7,108-14-0 in 1884 to Rs. 8,814-14-4 during the year under review, while the net profits realized by the sale of articles manufactured at the asylums fell from Rs. 3,733-0-9 in the previous year to Rs. 3,383-10-0 in the year under review.

7. The Governor in Council notices with satisfaction the commendation bestowed on the various Superintendents by the Surgeon General and is glad to

Digitized with financial assistance from the Government of Maharashtra on 11 July, 2017

observe that the official visitors, with two exceptions (whose names should be reported), were regular in their attendance. The Surgeon General has submitted his report with his usual punctuality and in it he has compressed a large amount of interesting information into a small space.

H. T. OMMANNEY,
Acting Under Secretary to Government.
